

## PEER BUDDY PROGRAM

The Peer Buddy Program was designed to help link patients together. For example, if you were recently diagnosed with prostate cancer, we have another patient who has recovered from treatment for prostate cancer who will volunteer to meet with you and help you through the process of coping with this disease.

These volunteers themselves have had cancer and have completed their treatment and are willing to help other patients who have just been diagnosed with the disease. To become a volunteer or to participate in this program, please call 653-2057. We have volunteers available to help you for the following cancer sites

BLADDER

BREAST

COLON & RECTUM

ESOPHAGEAL

HEAD & NECK

KIDNEY

LEUKEMIA

LUNG

LYMPHOMA

MELANOMA

OVARY

PROSTATE

TESTICULAR

THYROID
