

NHPA Project Announcement: Demolition of Cold War-era facility

The United States Air Force is initiating section 106 consultation under the National Historic Preservation Act of 1966 (as amended) for a federal undertaking to demolish Building #10237 (Hobby Shop), an obsolete facility located in Area II of Nellis Air Force Base (NAFB), Nevada. Originally built in 1957, there are no plans to build any structure to replace this facility. The area where building is to be demolished will be covered in gravels to abate long term dust effects.

All demolition activities will occur in areas that are previously disturbed and have been surveyed previously with no historic properties present. No new surveys will be required due to the proposed undertaking. The direct Area of Potential Effect (APE) includes the building footprint of 55 feet by 120 feet, as well as a buffer of twenty meters for any equipment movement or laydown yards. There are no known cultural resources located within the 800-meter indirect APE.

If you have any questions or concerns regarding this undertaking, please contact the Cultural Resources Office at Nellis Air Force Base via email at 99CES.CulturalResources@us.af.mil.
